

## Reem Almijmaj LAB4

Create a DynamoDB table of your choice, but choose a different subject from the Books example you have seen in class (see screenshot below). Submit a screenshot showing an item being created with attributes of the following data types: string, number, list, set, map, and Boolean.

**Attributes** Add new attribute ▼

Attribute name	Value	Type	
CustomerName - Partition key	<input type="text" value="Yasmin Abdullah"/>	String	
PaymentAmount - Sort key	<input type="text" value="25"/>	Number	
<input type="text" value="Teleordering"/>	<input checked="" type="radio"/> True <input type="radio"/> False	Boolean	<input type="button" value="Remove"/>
<input type="checkbox"/> CustomerInfo	<input type="text" value="Insert a field ▼"/>	Map	<input type="button" value="Remove"/>
<input type="checkbox"/> PhoneNumber	<input type="text" value="3474848730"/>	Number	<input type="button" value="Remove"/>
<input type="checkbox"/> Address	<input type="text" value="1019 W 25th street"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> Email	<input type="text" value="Yasmin@gamil.com"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> Products	<input type="text" value="Insert a field"/>	String set	<input type="button" value="Remove"/>

<input type="checkbox"/> Products	<input type="text" value="Insert a field"/>	String set	<input type="button" value="Remove"/>
<input type="checkbox"/> 0	<input type="text" value="milk"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> 1	<input type="text" value="apple"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> 2	<input type="text" value="eggs"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> ProductPrices	<input type="text" value="Insert a field"/>	Number set	<input type="button" value="Remove"/>
<input type="checkbox"/> 0	<input type="text" value="2.4"/>	Number	<input type="button" value="Remove"/>
<input type="checkbox"/> 1	<input type="text" value="1"/>	Number	<input type="button" value="Remove"/>
<input type="checkbox"/> 2	<input type="text" value="5"/>	Number	<input type="button" value="Remove"/>
<input type="checkbox"/> FavouriteBrand	<input type="text" value="Insert a field ▼"/>	List	<input type="button" value="Remove"/>
<input type="checkbox"/> 0	<input type="text" value="Haldiram's"/>	String	<input type="button" value="Remove"/>
<input type="checkbox"/> 1	<input type="text" value="Tombstone"/>	String	<input type="button" value="Remove"/>
